**Product Details****AIS LOUNGE PRODUCT DETAILS**

AIS lounge products are proudly made from high-quality, sustainably-sourced materials.

Durable, long-lasting construction is achieved in every facet of each product. Hand-crafted puzzle-joinery and water-based adhesives are integrated into the structural components. High-density foam cushions ensure extended comfort. Premium materials and hardware such as powder coated paint and diecast aluminum supports accentuate the sturdiness of the product line without sacrificing in aesthetics.

Thermally-fused laminate promises durability and strength, and speaks to the extended quality of these high traffic products such as LB Lounge, Prisma tables and lounge tablet arms. High-quality fasteners and intentionally sourced hardware ensure strong connections within the product construction of laminate lounge products.

**Assembly**

Minimal assembly is required with most AIS lounge products. Instructions for LB Lounge assembly can be found on the main website, [www.ais-inc.com](http://www.ais-inc.com).

**Note:** All AIS alta upholstery orders will have alta application as a standard feature. Alta enables virtually any textile to withstand the rigors of real life without leaving a mark. Alta improves repellency to oil and water based stains, is easy to clean and can enhance physical properties of the fibers. The technology is permanent and imperceptible to the eye and hand. To Clean: Blot with a dry towel. If residue remains, flush with warm water. Learn more at [applied-textiles.com](http://applied-textiles.com)

**Note:**

Please check with Customer Service regarding yardage requirements when multiple chairs are ordered as there may be efficiencies when cutting materials for more than one chair. Fabrics may be discontinued or obsolete without notice. Contact AIS Customer Service with any questions regarding fabric availability. Trix requires a full yard C.O.M fabric testing.

 \*\*Yards per LB Ottoman

*Lounge Seating Fabric Calculation Example:*

2-Seater (2 seats, 2 backs= 4 total cushions) requires 1.25 yards per each back cushion and 1.25 yards per each seat cushion. Total yardage needed 1.25x4 = 5 total yards.

**COM Fabric Policy**

- Please view all pre-approved COMs here: <https://www.ais-inc.com/resources/fabrics-and-finishes/pre-approved-coms>
- It is mandatory that you work directly with your AIS Customer Service Representative for all COM related testing and orders. They will provide all necessary forms to you, as well as work with you with regard to sending in correct yardage and where to send it, along with necessary RA# or #s. Please note an RA must be submitted along with the fabric for testing, as well as an RA created for an actual order.
- Customer Service must be advised as to the width of the fabric rolls being supplied (54"W or 60"W). Customer Service must also be advised if the fabric has a backer.
- Once AIS has approved the COM fabric, a fabric sample needs to be marked by the dealer with "Front", "Top", and "Bottom", to be sure fabric is applied correctly. The fabric sample then needs to be attached to a COM Fabric Dealer Form and forwarded to AIS Customer Service. The COM Fabric Dealer Form may be downloaded or printed here: [https://dealernet.ais-inc.com/media/qykjn5yl/ais-com-form\\_final\\_2024.pdf](https://dealernet.ais-inc.com/media/qykjn5yl/ais-com-form_final_2024.pdf)
- Fabrics may be discontinued or obsolete without notice.
- Contact AIS Customer Service with any questions regarding fabric availability.
- All directional fabric will be railroaded.
- Yardage requirements posted in the price list are based on non-directional 54" materials. It is important to note that 54" wide rolls need to be 54" of usable material. Please refer to the following conversion chart to determine accurate yardage requirements when COM is 54" wide and has a repeat.
- These percentages are for estimating purposes only. AIS will not be held responsible for shortages on COM products. For assistance, please contact your AIS CSR.
- Please complete this form, found on our main website, and submit to your CSR when requesting COM for testing or for an order.
- To help us expedite your test results and/or your order, please send your AIS CSR tracking information. Please clearly mark all materials with the following: dealer's name, AIS RA#, model # and quantity of items to be covered. Failure to provide your RA# will result in a delay in processing your order.
- AIS reserves the right to reject any covering that is unsuitable for upholstering our products. Approval for COM fabrics on AIS products signifies that the material in question can be applied to the products the material was specifically tested for. This approval also does not act as a form of warranty for the material's appearance, durability or behavior on AIS products.
- AIS will not be responsible for wearing, fading, stretching or poor performance of any covering materials whether supplied by the buyer or by our sources. AIS cannot be responsible for dye lot variations, defects, color inaccuracies, or any other type of flaws. While AIS does inspect fabrics for mill imperfections, not all imperfections are perceptible.
- Excess COM yardage will not be stored or returned unless clearly indicated on the purchase order.

**LB LOUNGE CORNER UNIT (3-CUSHION) SPECIFICATION GUIDE**

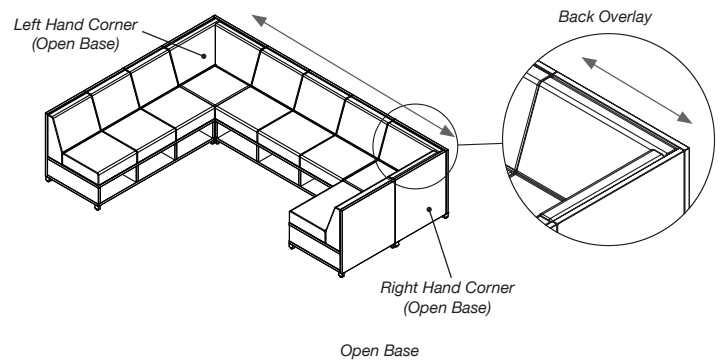

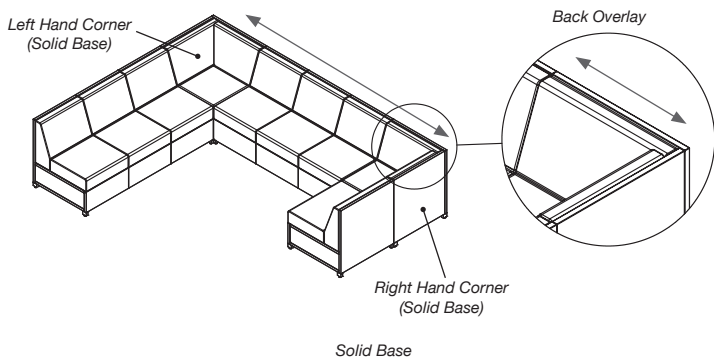

LB Lounge Corner Units can be used to finish the ends (bookend) of a run of LB Lounge couches.

It is generally advised to use LB Lounge Corner Units with the same open/solid bases as the adjacent pieces. This will give the best appearance, should the peripheral LB Lounge units move away from the central piece for some reason.

LB Lounge Corner units are designed to have a continuous rear overlay along the back of the central unit. This gives the assembly a cleanest appearance in most situations. To change the overlay direction, swap the left and right handed corner units.
