# USING AND PROGRAMING

## E Series and Day-to-Day Height Adjustable Tables

You can adjust your table for a range of heights between 23" and 48".

To adjust the table up and down, simply press the up arrow for up or the down arrow for down.

### Program Pre-Set Heights

1. Press the up/down button to set your desired height.
2. Click the 'Set' button and then press button 1, 2, 3 or 4

Consider setting your preset heights to standard heights such as:

Seated task work

Active motion

*Ex: eating or collaboration*

Standing task work

### Program Pre-Set Heights

1. Press and hold 1, 2, 3 or 4 to adjust table to pre-set height.

### Helpful Hints

- Ensure all obstructions are removed below, around and above table. However, if table encounters an obstacle during movement, the table will automatically stop and adjust itself upwards ½" so the obstruction can be cleared.
- For further troubleshooting, please contact your facility manager.

If you need to reset your control pad for the table, please visit <https://imagelibrary.ais-inc.com/detail/height-adjustable-control-pad-reset-video-overview>
