

CHELSEA™

Seating

AIS

BEAUTIFUL. SIMPLE. COMFORTABLE.

You can have it all with Chelsea.

The Chelsea task chair couples all day comfort with an eye-catching back design. With its intuitive adjustments and flexible lumbar support, Chelsea ensures you'll be comfortable quickly. Plus, its simplified finishes and toolless, quick-connect assembly make specification and install easy!

White, distinguished, slim frame

The frame is key to Chelsea and was designed to appear light and fresh.

Integrated Lumbar

The adjustable lumbar is designed to slide within the Chelsea back frame, giving users the support they need with an easy vertical lift up or down.

3D Arms: height, width adjustment with arm pad adjustment

The intuitive adjustments allow users to find the perfect spot to rest their arms throughout the workday. Slide the arm uprights out to give more width within the chair if needed.

Thoughtful touchpoint design

Arm pads and frequently touched levers are intentionally designed in black, keeping the white frame and arms clean.

Black-striped mesh back and waterfall edge seat

The breathable mesh back combined with the waterfall edge seat creates maximum comfort for all-day seating.

Synchro-tilt mechanism with 4 position back-stop

Chelsea's back stop allows users to limit their recline at 4 points, including an upright stop. Back tension is easily adjusted with a front knob adjustment.

CHELSEA

Designed by Justus Kolberg

"I designed Chelsea with the aim of making a chair that appears light, fresh, young and likeable. My goal was to create a product of innovative simplicity that shows how comfortable it is. The central element is the flexible lumbar support, which is almost completely covered by the back frame."

Adjustable lumbar with 2.4" of height adjustment.

3D arms with 1.4" of arm width adjustment on each side.
