

# MONITOR ARMS

AIS

# ERGONOMIC – DESIGNED TO FIT

AIS monitor arms are designed to fit any ergonomic requirement. Monitors can be suspended above the desk, to easily be repositioned by any user. With high quality gas cylinders all the monitors can easily be repositioned to meet the user's task. The clean design of the monitor arm allows for more worksurface space with integrated cable management.

The AIS monitor arm can easily be installed as a clamp or bolt mount and can be easily changed without the need for additional hardware or complicated installation.

## Features

- LCD Display size range: 10" - 28"
- Load capacity: 19 lbs per single arm unit
- Display tilt rotation: 180° rotation at the mounting base and extension
