

Calibrate Height Adjustable Base with Storage

Date	Page No.	Description of change	Name
11/9/2020	12-15	Updated control box and 90-degree cable	S. Powers
7/25/2022	1-18	E-Series integration (50mm x 80mm column)	S. Powers
5/15/2023	11,14	Added u-channels to worksurface 78W+	S. Powers
11/26/2024	4	Updated P1 replacement part number	S. Powers
04/09/2025	9,17	Added details for using 90° cables	S. Powers
09/30/2025	4,7-8	Updated P6 screw, removed duplicate P8	S. Powers
10/17/2025	5	Update part numbers P14, P20, P21	S. Powers

Calibrate Height Adjustable Base with Storage

*****READ ALL INSTRUCTIONS BEFORE USING*****

- For commercial use only.
- Warning: Risk of Injury – Maximum load 275 lbs. 2 leg, 325 lbs. 3 leg
- Electrical rating: 120V, 60Hz, 16 AMP
- No more than 12 furnishings can be connected on one branch circuit.

IMPORTANT SAFETY INSTRUCTIONS

DANGER – To reduce risk of electric shock:

- Always unplug furnishing from the electrical outlet before cleaning.

WARNING – To reduce the risk of burns, fire, electric shock, or injury to persons:

- Unplug from outlet before putting on or taking off parts.
- Close supervision is necessary when this furnishing is used by, or near children, invalids or disabled persons.
- Use this furnishing only for its intended use as described in these instructions. Do not use attachments not recommended by the manufacturer.
- Never operate this furnishing if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water.
- Keep the cord away from heated surfaces.
- Never operate the furnishing with the air openings blocked. Keep the air openings free of lint, hair and the like.
- Do not use outdoors.
- To disconnect, turn all controls to the off position, then remove plug from outlet.
- Connect to a properly grounded outlet only. See grounding instructions.
- For loading always put heavier items at the bottom and not near the top in order to help prevent the possibility of the furnishing tipping over.

Calibrate Height Adjustable Base with Storage

GROUNDING INSTRUCTIONS

This product is for use on a circuit having a nominal rating more than 120 volts and is factory-equipped with specific electric plug to permit connection to a proper electric circuit. Make sure that the product is connected to an outlet having the same configuration as the plug. No adapter should be used with this product

Calibrate Height Adjustable Base with Storage

Step 1: Install height adjustable mounting plate(s) to bottom of Calibrate storage pieces(s)

Align hole pattern on mounting plate to opening on laminate base

When screwing into bottom and vertical wall

When screwing into bottom only

Calibrate Height Adjustable Base with Storage

Step 2: Install Trim Ring(s) to top of Calibrate storage pieces(s)

Step 3: Install columns into the laminate bases as shown.

Calibrate Height Adjustable Base with Storage

Step 4: Install feet. (only for columns without storage or stand-alone leg)

If Columns require a storage piece or glide, skip this step and proceed to Step 5.

Step 5: Install Glide and Glide Plate (only for columns without storage or feet)

If Columns require a storage piece or foot, skip this step and proceed to Step 6.

Calibrate Height Adjustable Base with Storage

Step 6a (for 2 leg configurations):

Temporarily connect all height adjustable electrical components as shown.

1. Connect Leg 1 to Control Box Port M1.
2. Connect Leg 2 to Control Box Port M2 using the 1.3M cable.
3. Connect the Hand Switch to Control Box Port HS.
4. Connect the Power Cord to the Control Box.

Note: Rest the control box on the base. The control box must be motionless to properly function.

Note: Control boxes feature ports on either the top face (90° connection shown below) or on the side (straight connection). You may be supplied both 90° and straight cables. Make sure to use the 90° cable in the 90° port only and use the straight cable in the straight port only, as shown below.

Calibrate Height Adjustable Base with Storage

Step 9b (for 3-leg configurations):

Temporarily connect all height adjustable electrical components as shown.

1. Connect Leg 1 to Control Box Port M1.
2. Connect Leg 2 to Control Box Port M2 using a 1.3M cable.
3. Connect Leg 3 to Control Box Port M3 using a 1.3M cable
4. Connect the Hand Switch to Control Box Port HS.
5. Connect the Power Cord to the Control Box.

Note: Rest the control box on the base. The control box must be motionless to properly function.

Step 7: Raise unit to the fully extended height. Temporarily disconnect all wires.

Calibrate Height Adjustable Base with Storage

Step 8: Install the worksurface support components to the height adjustable columns.

Calibrate Height Adjustable Base with Storage

Step 9 (for 3 leg configurations): Install the worksurface support components to the height adjustable columns for the return leg.

3-Leg

Calibrate Height Adjustable Base with Storage

Step 10: Position the worksurface on the height adjustable support frame and secure in place using (8) M5 x 20mm wood screws.

4mm Hex Drive
8 places

Calibrate Height Adjustable Base with Storage

Step 11 (for worksurfaces 78"W and up): Install (2) u-channels to worksurface using #9 x 7/8" screws.

Calibrate Height Adjustable Base with Storage

Step 12 (for 3 leg configurations): Position the return worksurface on the height adjustable support frame and secure in place using (8) M5 x 20mm wood screws.

3-Leg

Step 13 (for 3 leg configurations): Align the return worksurface to the main worksurface. Secure in place using (2) U-Channels and #9 x 7/8" screws.

3-Leg

Calibrate Height Adjustable Base with Storage

Step 14: Install the control box to the worksurface using (2) M5 x 16mm wood screws.

Step 15: Install the hand switch to the worksurface using (2) M5 x 16mm wood screws.

Calibrate Height Adjustable Base with Storage

Step 16a (for 2 leg configurations):

Re-connect all height adjustable electrical components as shown.

1. Connect Leg 1 to Control Box Port M1.
2. Connect Leg 2 to Control Box Port M2 using the 1.3M cable.
3. Connect the Hand Switch to Control Box Port HS.
4. Connect the Power Cord to the Control Box.

Note: Control boxes feature ports on either the top face (90° connection shown below) or on the side (straight connection). You may be supplied both 90° and straight cables. Make sure to use the 90° cable in the 90° port only and use the straight cable in the straight port only, as shown below.

Calibrate Height Adjustable Base with Storage

Step 16b (3 leg configurations):

Re-connect all height adjustable electrical components as shown.

1. Connect Leg 1 to Control Box Port M1.
2. Connect Leg 2 to Control Box Port M2 using a 1.3M cable.
3. Connect Leg 3 to Control Box Port M3 using a 1.3M cable
4. Connect the Hand Switch to Control Box Port HS.
5. Connect the Power Cord to the Control Box.

3-Leg

Calibrate Height Adjustable Base with Storage

Step 17: Test height adjustable unit for proper functionality.
