

PLAINVILLE TOWN HALL

Case Study

AIS

Industry:	Township	Number of stations:	90
Location:	Plainville, MA	Project Size:	55,000 sq ft

Company Overview & Project Needs

Plainville Town Hall houses centralized services to its citizens from public works, permitting, zoning and development, and parks and recreation, to resources for conservation and environmental protection.

As a supporter of its local community and the New England region, it was important to the board to utilize an office furniture solution company that was locally sourced.

The township staff provides a high number of services at a fast pace and has a high volume of documents that need to be stored. In the new space, it was key to have effective, efficient furniture that could support this pace with an aesthetic that was unified. Another key contributing factor in the project was providing a variety of furniture that could support individual workers, board and staff meetings, and an environment that the community could be proud of when hosting its residents.

The Results

AIS was chosen because it could deliver product quickly as a local supplier and provide solutions for the entire building, in addition to the Fire Station. Matrix with its flexible work spaces and sophisticated design was paired with Calibrate to support the shifting needs of workers throughout their work days. Day-to-Day tables with casters were installed in the training room to support collaboration and be quick to change to different departmental needs. Natick and Stow seating were chosen to comfortably support worker productivity in individual workspaces as well as in the training room.

AIS Solutions

- Matrix Panel System
- Day-to-Day Tables
- Calibrate Series Caseworks and Storage
- Natick Task Seating
- Stow Multi-Purpose Seating

Matrix Wood Laminate Panels with Privacy Screens

Matrix Touchdown Stations with Calibrate Storage
