

DOCK-1200-2 Series Installation Instructions

Model: TVO23100-152-M-4.2A-TR

Rating: AC 125V, 60Hz, 15A

USB Output: DC 5V, 4.2A

CAUTION:

To prevent the risk of fire and electric shock, please be sure to read all instructions before installing or using this unit.

WARNING:

To reduce the risk of fire, electric shock or injury to persons:

- For indoor use only.
- Do not use with extension cords.
- Do not plug a device or devices into receptacles that exceed a total of 15A (1800 watts).
- Do not open or attempt to open unit for any reason.

MOUNTING:

1. Cut a 5.5"x2.0" (140.0mmx52.0mm) hole on the mounting surface.
2. Set the unit into the hole and then secure it with mounting screws.
3. Make sure that the unit is securely installed to the mounting surface.
Then, affix the faceplate by pressing it against the main unit.
4. Plug power cord to the nearest wall outlet. Make sure the wall outlet is properly grounded.

OPERATING INSTRUCTIONS:

Tamper-Resistant Receptacles: When inserting a plug into a tamper-resistant receptacle, it is important to push with even force on both plug blades. The insertion force should be very similar to that of regular receptacle. If excess force is required to insert a plug into a tamper-resistant receptacle, the blades on the plug may be damaged or may not meet NEMA standards.

USB Charger: The unit supplies total of 4.2A (21 watts) DC 5V charging power. Please do not attempt to connect any device that requires higher power consumption or the unit may be damaged.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
