Arm height, width, depth, and rotational adjustment (4-D arms)

Devens comes standard with highly adjustable 4-D arms to support user preferences.

Seat height adjustment accommodates numerous body dimensions

Devens offers 4.75" of seat height adjustment to support user needs and preferences.

Weight-balanced synchro-tilt mechanism with multi-position back-lock

Choose the optimal back position and lock into place. Control is located on the left underside of the seat. This weight-balanced mechanism automatically adjusts seat back tension, so users don't have to.

Body conforming and adjustable lumbar support

Easy to adjust, Deven's height-adjustable lumbar is standard and provides fitting and comfortable support for the lower back throughout the day.
