

ENGAGED COMPANIES

Case Study

AIS

Industry:	Information Services	Number of stations:	105
Location:	Parkville, MO	Project:	National Headquarters

Company Overview & Project Needs

Engaged Companies is an information technology solutions firm that focuses on providing transportation management services .

Engaged Companies found that based on their current and future growth that it was necessary for them to relocate into a new office space. Design, price and timing were three major factors that the client evaluated before reaching a final decision. The architecture of the new headquarters includes floor to ceiling windows on each side that allows a great view of the surrounding landscape as well as provides natural sunlight to the workspace. It was important to choose a product that would not impede these features of the new building.

The Results

By providing fast leadtimes, hands-on design support and high quality products at a fraction of the price, AIS beat out major competitors. Additionally, a creative mixture of Oxygen, Divi and Calibrate was used to support both the unique architecture of the building and the client's vision.

Client Comments

"Our company operates several businesses under one roof, with varying work space needs for each department. The AIS products fit our needs perfectly, allowing for multiple work station configurations and storage options while looking cohesive throughout our space. The finishes are beautiful and the quality is high— at a fraction of the price of others we looked at. We're delighted with how this project turned out!"
