

OLYMPUS NDT CASE STUDY

THE PROJECT

International company operating in industrial, medical and consumer markets, specializing in optics, electronics and precision engineering.

AIS was chosen to outfit Olympus with 300 new stations because of its capabilities and great product quality. Other factors were location and cost. AIS was a local manufacturer that offered competitive pricing.

For this project, Matrix was chosen for its ability to provide customized workspaces. Calibrate was also used for storage purposes, outfitting workstations with towers and credenzas.

OLYMPUS NDT CASE STUDY

Olympus is focused on improving people's lives every day through innovation. As a precision technology leader, they design and deliver innovative solutions in our core business areas: Medical and Surgical Products, Life Science Imaging Systems, Industrial Measurement and Imaging Instruments and Cameras and Audio Products.

Their products are used to capture images of our world from the microscopic to the panoramic. They're instrumental in furthering scientific research, by being able to travel inside the human body to help diagnose, treat and prevent illness.
