

Matrix Arch Door Frame Install

Details

Matrix Arch Door Frame installs using the same method as standard frames, with the addition of a threshold and field installed trim covers.

Handle Parts

- 1. Door Frame
- 2. Trim Covers

Step 1

Once the frame is installed adjust the threshold height as needed. Once this is done, attach the trim covers (using the pre-installed double sided tape) to the frame.

Note: Install the side covers first, and the top cover second.
