

Reliant Medical

Case Study

AIS

Industry:	Healthcare	Number of stations:	400
Location:	Multiple Locations in MA	Project Size:	1,000,000 sq ft

Company Overview & Project Needs

As one of the most dynamic and progressive healthcare organizations in the country today, Reliant Medical continues to grow, with over 25 locations in Metro-west and Central Massachusetts. Reliant Medical's newest building incorporates a light and airy feel. They wanted their furniture to enhance that light feel, while offering privacy to the end user. Another furniture requirement was power and data. Reliant wanted their employees to never need more power within their workstation. Finally, the uniqueness of a medical business is a higher amount of storage required. The storage needed to be robust without taking up valuable square footage

The Results

AIS was able to provide solutions utilizing Matrix, Calibrate, Day-to-Day Tables, and L Series Storage. A low Matrix station was chosen with a glass upmount screen to incorporate light, while still giving users privacy. Matrix is also known for its robust power and data accessible in the panel raceway, which was perfect to meet the needs of Reliant. Other products, such as Day-to-Day tables and L Series storage, enhanced Matrix and met Reliant's needs perfectly. The performance of these products, coupled with the overall look and value were why AIS was chosen as Reliant's main furniture provider for all their new buildings.

AIS Solutions

- Matrix Panel System
- Calibrate Series Casegoods
- Day -to-Day Tables
- L Series Storage
- Pierce Seating
